

Title: Article Quickstart Guide

Subtitle: XOOPS

Author: Carnuke

Date: 2005/11/27

URL: <http://xoopsforge.com/modules/article/view.article.php/c1/22>

Keywords: module, Article, install, config

Installation routine

- 1- Install Article as per xoops standard module installation
- 2- In xoops Admin menu: select- modules>administration then click the Article install icon
- 3- Select Groups with Admin and Access rights and click 'Install'
- 4- Data Installation page should finish with 'Module Article installed successfully.'
- 5- Click 'Back to Module Administration page'
- 6- Back in module administration page Article will now appear in active modules list.
- 7- You may rename the module in this page by entering the form beneath the module icon.
- 8- The module can also be deactivated, uninstalled or hidden from main menu from Module administration page.
- 9- Click submit after any changes.

Setup:

- 1- Click the module icon in module admin page or, menu> Modules>Article>index
- 2- Module preferences and stats are displayed beneath the tabbed section areas.
- 3- Create 'File path' and 'Image path' folders by activating the links 'Create folder'
- 4- If 'Not available' persists, create these folder manually inside xoops/uploads folder
- 5- Give folders permissions 777 or lower if your system allows
- 6- Refresh article index page and confirm both new folders show 'Available'

Configuration:

1- In admin menu: select- Preferences> Article>General settings. Change settings or leave defaults until familiar.

2- Leave defaults or change as required for Preferences> Article>Module settings and Module preferences.

3- At least one category must be created to store articles. Either edit existing preloaded category, or create new.

4- Click Category tab, or select admin menu> modules>article>category

5- Enter category form details as required (must include TITLE)
